Architecture Diagram

Demo

● Challenges

- Feature related
  - Child comments
  - Updating votes
  - Knowing who is logged in for posts/comments
  - Knowing what post you are commenting on
  - Designing Database Architecture
- Group related
  - Finding time where the entire team could meet to understand the status of our project, and where the timeline was at.
  - Staying true to Agile methods while completing features within the sprint time frame.

Thanks!
